

The MFHC Promise

Monmouth Family Health Center is proud to serve the historical and diverse community of Long Branch and its surrounding towns. Today, and for over fourteen years, the center has been here to provide knowledgeable and sensitive care to our patients and their families.

The center takes great pride in being a multi-lingual health care center focused on the physical, mental and social well-being of our patients. A large part of that focus is to provide comprehensive care services to patients of all cultures, religions, languages and is especially inclusive of individuals with intellectual and developmental disabilities. The balance of this focus centers on embracing the patient and their families and as a team coordinating the continuity of care and services that all patients deserve.

Often those we serve have health care needs that are complicated by physical, social/emotional and/or mental health needs. MFHC partners with many community, state and federal organizations that provide extensive support services for these individuals and their families. At MFHC we strive to supply the resources in care that area available and provide the link to these services for our patients.
